

Scale Chords Readme and License

You are allowed to use the MIDI files and graphics of this package free of charge for both personal and commercial works. The following rules apply:

- You can't claim to be the creator of these files.
- You cannot redistribute, resell, lease, license, sub-license or offer any of the files to any third party. This includes hosting more than eight of these files on another site.
- However, sharing single unaltered files on other websites is absolutely fine (eg. sharing an infographic on Facebook, Twitter, Pinterest,...).
- Please don't hotlink the files.
- If you use the files for presentations etc., you need to provide a link back to feelyoursound.com or feelyoursound.com/scale-chords/

Some examples of what is fine:

- You do a tutorial and use some of the images to explain the chords. You provide a link back to feelyoursound.com.
- You use the MIDI files for your own music.

But this is not OK:

- You bundle some of the files and provide them as a separate download.

Play all these chords with just one click!

All the chords are coming straight out of Sundog Scale Studio. Play MIDI chords on your favourite synths with one click, create chord progressions, experiment with 300+ different scales, export MIDI files to your DAW, and much more. Works with Ableton Live, Bitwig, FL Studio, Logic Pro X, Reaper,...
